

FC Rottenburg mission statement - “Football and more!” (4th version 21.11.24)

Soccer is a game played with passion all over the world. As divided as people may be by politics, origin, or wealth, this sport unites them. Even when tensions run high between players and spectators, and even though far too much money is at stake in the professional game, soccer remains about more than just winning or profit.

Soccer is a school for life — a place where you experience the value and beauty of team spirit, fairness, and reliability. It teaches you how to handle both success and failure — as an individual and as part of a team. It’s a school where both assertiveness and consideration have their place.

FC Rottenburg is an ambassador for the city of Rottenburg, a vibrant, family-friendly, and socially engaged community. The club reflects the character of the city — striving for performance and success in competition with the best teams in the region, but also much more. FC Rottenburg is a place where soccer is played with passion, ambition, and joy. A place where young people find both physical and mental balance in a world increasingly marked by inactivity, self-centeredness, and artificial intelligence.

It is a club that fosters a sense of community through soccer — a community that can even feel like home. A home where money is not the highest value, but rather the feeling of belonging — no matter who you are or where you come from. In this way, our soccer club makes an important contribution to integration and social harmony in our urban society.

FC Rottenburg aims to bring joy and vitality to its players and supporters through modern, successful, and attractive soccer. Everyone who works for the club does so with professionalism and warmth. They consistently uphold timeless values such as punctuality, discipline, and respect. They support the personal and team development of players with care and long-term commitment. That’s why youth work is at the heart of FC Rottenburg — because this is the age at which the foundations are laid: human, social, and footballing.
